EXPLANATORY NOTE

This amendment to the Quarterly Report on Form 10-Q/A ("Amendment No. 1") is being filed in order to include disclosure regarding previously undisclosed out-of-period adjustments to the consolidated financial statements that were included in Part I, Items 1 and 2 of the original Quarterly Report on Form 10-Q for the quarterly period ended March 31, 2012 previously filed on April 27, 2012 (the "Original Filing").

During the second quarter of 2012, we identified an error in the consolidated financial statements for the year ended December 31, 2011 and the quarter ended March 31, 2012. The error was attributable to the misapplication of accounting guidance related to the recognition of a deferred tax asset resulting from an impairment of assets in the fourth quarter of 2011 that failed to consider a partial reversal of that asset that would result from a cancellation of related inter-company debt in the first quarter of 2012. During the first quarter of 2012, we identified an error that impacted the above referenced periods. The error was an over-accrual of incentive compensation cost. We have determined that the errors were not material in 2011 and are not material to our expected annual results for the year ending December 31, 2012. Accordingly, the cumulative change is reported as an out-of-period adjustment in the three months ended March 31, 2012 on our consolidated statement of operations.

This Amendment No. 1 amends only Part I, Items 1 and 2 of the Original Filing solely to reflect the revision of the notes to the consolidated financial statements and to add disclosure to Part I, Item 2 relating to such revision. The remaining items contained within this Amendment No. 1 consist of all other items originally contained in the Original Filing. These remaining items are not amended hereby, but are included for the convenience of the reader. Except for the foregoing amended information, this Amendment No. 1 continues to describe conditions as of the date of the Original Filing, and we have not updated the disclosures contained herein to reflect events that occurred at a later date. We are also updating the signature page and certifications of our Chief Executive and Financial Officers contained in Exhibits 31.1, 31.2, 32.1 and 32.2.

Corporate Office Properties Trust and Subsidiaries

**Notes to Consolidated Financial Statements
(unaudited)**

1. Organization

Corporate Office Properties Trust (“COPT”) and subsidiaries (collectively, the “Company,” “we” or “us”) is a fully-integrated and self-managed real estate investment trust (“REIT”) that focuses primarily on serving the specialized requirements of strategic customers in the United States Government and defense information technology sectors. We acquire, develop, manage and lease office and data center properties that are typically concentrated in large office parks primarily located adjacent to government demand drivers and/or in office markets that we believe possess growth opportunities. As of March 31, 2012, our investments in real estate included the following:

- 231 operating office properties totaling 20.2 million square feet;
- seven office properties under construction or redevelopment that we estimate will total approximately 903,000 square feet upon completion, including two partially operational properties included above;
- land held or under pre-construction totaling 2,327 acres (including 583 controlled but not owned) that we believe are potentially developable into approximately 20.5 million square feet; and
- a partially operational, wholesale data center which upon completion and stabilization is expected to have a critical load of 18 megawatts.

We conduct almost all of our operations through our operating partnership, Corporate Office Properties, L.P. (the “Operating Partnership”), of which we are the managing general partner. The Operating Partnership owns real estate both directly and through subsidiary partnerships and limited liability companies (“LLCs”). A summary of our Operating Partnership’s forms of ownership and the percentage of those ownership forms owned by COPT as of March 31, 2012 follows:

Common Units	94%
Series G Preferred Units	100%
Series H Preferred Units	100%
Series I Preferred Units	0%
Series J Preferred Units	100%
Series K Preferred Units	100%

Three of our trustees also controlled, either directly or through ownership by other entities or family members, an additional 5% of the Operating Partnership’s common units (“common units”) as of March 31, 2012.

In addition to owning real estate, the Operating Partnership also owns entities that provide real estate services such as property management and construction and development services primarily for our properties but also for third parties.

2. Summary of Significant Accounting Policies

Basis of Presentation

The consolidated financial statements include the accounts of COPT, the Operating Partnership, their subsidiaries and other entities in which we have a majority voting interest and control. We also consolidate certain entities when control of such entities can be achieved through means other than voting rights (“variable interest entities” or “VIEs”) if we are deemed to be the primary beneficiary of such entities. We eliminate all significant intercompany balances and transactions in consolidation.

We use the equity method of accounting when we own an interest in an entity and can exert significant influence over the entity’s operations but cannot control the entity’s operations.

We use the cost method of accounting when we own an interest in an entity and cannot exert significant influence over its operations.

[Table of Contents](#)

These interim financial statements should be read together with the financial statements and notes thereto as of and for the year ended December 31, 2011 included in our 2011 Annual Report on Form 10-K. The unaudited consolidated financial statements include all adjustments that are necessary, in the opinion of management, to fairly present our financial position and results of operations. All adjustments are of a normal recurring nature except for the out-of-period adjustment described below. The consolidated financial statements have been prepared using the accounting policies described in our 2011 Annual Report on Form 10-K.

During the second quarter of 2012, we identified an error in the consolidated financial statements for the year ended December 31, 2011 and the quarter ended March 31, 2012. The error was attributable to the misapplication of accounting guidance related to the recognition of a deferred tax asset resulting from an impairment of assets in the fourth quarter of 2011 that failed to consider a partial reversal of that asset that would result from a cancellation of related inter-company debt in the first quarter of 2012. The effect of this error was an overstatement of our income tax benefit and an understatement of our net loss for the year ended December 31, 2011 of \$4.0 million (\$0.05 per share). During the first quarter of 2012, we identified an error that impacted the above referenced periods. The error was an over-accrual of incentive compensation cost. The effect of this error was an overstatement of general and administrative expenses and an overstatement of net loss for the year ended December 31, 2011 of \$0.7 million (\$0.01 per share). The net impact of these errors was an understatement of our net loss for the year ended December 31, 2011 of \$3.3 million (\$0.04 per share). We have determined that the errors were not material in 2011 and are not material to our expected annual results for the year ending December 31, 2012. Accordingly, this cumulative change is reported as an out-of-period adjustment in the three months ended March 31, 2012 as follows: a reduction in net income of \$3.3 million (\$0.04 per share); an increase in income tax expense of \$4.0 million (\$0.05 per share); and a decrease in general and administrative expenses of approximately \$0.7 million (\$0.01 per share) on our consolidated statement of operations.

Reclassifications

We reclassified certain amounts from prior periods to conform to the current period presentation of our consolidated financial statements with no effect on previously reported net income or equity. Included among these reclassifications is a retrospective change in the presentation of costs expensed in connection with properties not in operations; these costs are included in the line on our consolidated statements of operations entitled "business development expenses and land carry costs," after having been included in property operating expenses in our 2011 Annual Report on Form 10-K.

Recent Accounting Pronouncements

We adopted guidance issued by the Financial Accounting Standards Board ("FASB") effective January 1, 2012 related to the presentation of comprehensive income that requires us to present the total of comprehensive income, the components of net income and the components of other comprehensive income either in a single continuous statement of comprehensive income or in two separate but consecutive statements. We adopted this guidance using retrospective application. This guidance eliminates the option to present the components of other comprehensive income as part of the statement of equity. Our adoption of this guidance did not affect our financial position, results of operations, cash flows or measurement of comprehensive income but did change the location of our disclosure pertaining to comprehensive income in our consolidated financial statements.

We adopted guidance issued by the FASB effective January 1, 2012 that amends measurement and disclosure requirements related to fair value measurements to improve consistency with International Financial Reporting Standards. In connection with our adoption of this guidance, we made an accounting policy election to use an exception provided for in the guidance with respect to measuring counterparty credit risk for derivative instruments; this election enables us to continue to measure the fair value of groups of assets and liabilities associated with derivative instruments consistently with how market participants would price the net risk exposure at the measurement date. Our adoption of this guidance did not affect our financial position, results of operations or cash flows but did result in additional disclosure pertaining to our fair value measurements.

We adopted guidance issued by the FASB effective January 1, 2012 relating to the testing of goodwill for impairment that permits us to first assess qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount as a basis for determining whether it is necessary to perform the two-step goodwill impairment test. This guidance eliminates the requirement to calculate the fair value of a reporting unit unless the entity determines that it is more likely than not that its fair value is less than its carrying amount. Our adoption of this guidance did not materially affect our consolidated financial statements or disclosures.

3. Fair Value Measurements

For a description on how we estimate fair value, see Note 3 to the consolidated financial statements in our 2011 Annual Report on Form 10-K.

Recurring Fair Value Measurements

The table below sets forth our financial assets and liabilities that are accounted for at fair value on a recurring basis as of March 31, 2012 and the hierarchy level of inputs used in measuring their respective fair values under applicable accounting standards (in thousands):

- (3) Included in the line entitled “other liabilities” on our consolidated balance sheet.

At December 31, 2011, we owned 1.9 million shares, or approximately 7%, of the common stock of The KEYW Holding Corporation (“KEYW”). During the three months ended March 31, 2012, we completed the sale of all of these shares for \$14.0 million. At March 31, 2012 and December 31, 2011, we owned warrants to purchase 50,000 additional shares of KEYW common stock at an exercise price of \$9.25 per share.

The carrying values of cash and cash equivalents, restricted cash, accounts receivable, other assets (excluding mortgage loans receivable) and accounts payable and accrued expenses are reasonable estimates of their fair values because of the short maturities of these instruments. We estimated the fair values of our mortgage loans receivable as discussed in Note 6 based on the discounted estimated future cash flows of the loans (categorized within Level 3 of the fair value hierarchy); the discount rates used approximate current market rates for loans with similar maturities and credit quality, and the estimated cash payments include scheduled principal and interest payments. For our disclosure of debt fair values in Note 7 to the consolidated financial statements, we estimated the fair value of our exchangeable senior notes based on quoted market prices for publicly-traded debt (categorized within Level 2 of the fair value hierarchy) and estimated the fair value of our other debt based on the discounted estimated future cash payments to be made on such debt (categorized within Level 3 of the fair value hierarchy); the discount rates used approximate current market rates for loans, or groups of loans, with similar maturities and credit quality, and the estimated future payments include scheduled principal and interest payments. Fair value estimates are made at a specific point in time, are subjective in nature and involve uncertainties and matters of significant judgment. Settlement of such fair value amounts may not be possible and may not be a prudent management decision.

For additional fair value information, please refer to Note 6 for mortgage loans receivable, Note 7 for debt and Note 8 for interest rate derivatives.

Nonrecurring Fair Value Measurements

We assess each of our operating properties for impairment quarterly using cash flow projections and estimated fair values that we derive for each of the properties. We update the leasing and other assumptions used in these projections regularly, paying particular attention to properties that have experienced chronic vacancy or face significant market challenges. We review our plans and intentions for our development projects and land parcels quarterly. Each quarter, we also review the reasonableness of changes in our estimated operating property fair values from amounts estimated in the prior quarter. If events or changes in circumstances indicate that the carrying values of certain operating properties, properties in development or land held for future development may be impaired, we perform a recovery analysis for such properties. For long-lived assets to be held and used, we analyze recoverability based on the estimated undiscounted future cash flows expected to be generated from the operations and eventual disposition of the assets over, in most cases, a ten-year holding period. If we believe there is a significant possibility that we might dispose of the assets earlier, we analyze

11

[Table of Contents](#)

recoverability using a probability weighted analysis of the estimated undiscounted future cash flows expected to be generated from the operations and eventual disposition of the assets over the various possible holding periods. If the recovery analysis indicates that the carrying value of a tested property is not recoverable from estimated future cash flows, it is written down to its estimated fair value and an impairment loss is recognized. If and when our plans change, we revise our recoverability analyses to use the cash flows expected from the operations and eventual disposition of each asset using holding periods that are consistent with our revised plans.

Property fair values are determined based on contract prices, indicative bids, discounted cash flow analyses or yield analyses. The estimated cash flows used are based on our plans for the property and our views of market and economic conditions. The estimates consider items such as current and future rental rates, occupancies for the tested property and comparable properties, estimated operating and capital expenditures and recent sales data for comparable properties; most of these items are influenced by market data obtained from third party sources such as CoStar Group and real estate leasing and brokerage firms and our direct experience with the properties and their markets.

We recognized impairment losses on certain properties and other assets associated with such properties during the three months ended March 31, 2012. Accordingly, certain properties and related assets were adjusted to fair value. The table below sets forth the fair value hierarchy of the valuation techniques used by us in determining such fair values (dollars in thousands):

Description	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Total	Impairment Losses Recognized

The table below sets forth quantitative information about significant unobservable inputs used for the Level 3 fair value measurements reported above:

Dispositions and Impairments

We sold the following operating properties during the three months ended March 31, 2012 (dollars in thousands):

Project Name	Location	Date of Sale	Number of Buildings	Total Rentable Square Feet	Sale Price	Gain on Sale
White Marsh Portfolio (1)	White Marsh, Maryland	1/30/2012	5	163,000	\$ 19,100	\$ 2,445
1101 Sentry Gateway	San Antonio, Texas	1/31/2012	1	95,000	13,500	1,750
222 and 224 Schilling Circle	Hunt Valley, Maryland	2/10/2012	2	56,000	4,400	202
			8	314,000	\$ 37,000	\$ 4,397

(1) Includes three properties comprising the White Marsh Professional Center, 8615 Ridgely's Choice and 8114 Sandpiper Circle.

We also sold non-operating properties during the three months ended March 31, 2012 for aggregate sale prices totaling \$25.7 million; in addition to the gain on sales reflected above, we also recognized impairment losses on certain of these sales that are disclosed below.

As discussed in our 2011 Annual Report on Form 10-K, we implemented a plan in 2011 to dispose of office properties and land that are no longer closely aligned with our strategy (the "Strategic Reallocation Plan"). During the three months ended March 31, 2012, we recognized aggregate net impairment losses in connection with the Strategic Reallocation Plan of \$6.6 million (including \$1.5 million classified as discontinued operations and \$1.1 million in exit costs). Approximately \$5.1 million of these losses related to our expected disposition of an additional property. The expected cash flows from the resulting shortened holding period for this property are not sufficient to recover its carrying value.

2012 Construction Activities

As of March 31, 2012, we had construction underway on six office properties that we estimate will total 789,000 square feet upon completion, including three in the Baltimore/Washington Corridor, one in Greater Baltimore, one in Northern Virginia and one in Huntsville, Alabama, and redevelopment underway on one office property in Greater Philadelphia that we estimate will total 113,000 square feet upon completion.

5. Real Estate Joint Ventures

During the three months ended March 31, 2012, we had an investment in one unconsolidated real estate joint venture accounted for using the equity method of accounting. Information pertaining to this joint venture investment is set forth below (dollars in thousands):

Investment Balance at (1)		Date Acquired	Ownership	Nature of Activity	Maximum Exposure to Loss (2)
March 31, 2012	December 31, 2011				
\$ (6,178)	\$ (6,071)	9/29/2005	20%	Operates 16 Buildings	\$ —

(1) The carrying amount of our investment in this joint venture was lower than our share of the equity in the joint venture by \$5.2 million at March 31, 2012 and December 31, 2011 due to our deferral of gain on the contribution by us of real estate into the joint venture upon its formation. A difference will continue to exist to the extent the nature of our continuing involvement in the joint venture remains the same.

(2) Derived from the sum of our investment balance and maximum additional unilateral capital contributions or loans required from us. Not reported above are additional amounts that we and our partner are required to fund when needed by this joint venture; these funding requirements are proportional to our respective ownership percentages. Also not reported above are additional unilateral contributions or loans from us, the amounts of which are uncertain, that we would be required to make if certain contingent events occur (see Note 15).

The following table sets forth condensed balance sheets for this unconsolidated real estate joint venture (in thousands):

	March 31, 2012	December 31, 2011

(2) This joint venture's properties are in College Park, Maryland (in the Suburban Maryland region).

(3) This joint venture's property is in Huntsville, Alabama.

(4) This joint venture's property is in Hanover, Maryland (in the Baltimore/Washington Corridor).

(5) This joint venture's property is in Charles County, Maryland.

(6) This joint venture's property is in Lanham, Maryland (in the Suburban Maryland region).

Our commitments and contingencies pertaining to our real estate joint ventures are disclosed in Note 15.

6. Prepaid Expenses and Other Assets

Prepaid expenses and other assets consisted of the following (in thousands):

	March 31, 2012	December 31, 2011
Mortgage and other investing receivables	\$ 32,739	\$ 27,998
Prepaid expenses	14,196	20,035

Lease incentives	5,360	5,233
Other assets	5,358	6,133
Prepaid expenses and other assets	\$ 96,532	\$ 87,619

(1) Represents unsettled proceeds from sales of KEYW common stock that settled shortly following the respective reporting dates.

Mortgage and Other Investing Receivables

Mortgage and other investing receivables consisted of the following (in thousands):

	March 31, 2012	December 31, 2011
Notes receivable from City of Huntsville	\$ 22,526	\$ 17,741
Mortgage loans receivable	10,213	10,257
	\$ 32,739	\$ 27,998

Our notes receivable from the City of Huntsville funded infrastructure costs in connection with our LW Redstone Company, LLC joint venture (see Note 5). Our mortgage loans receivable reflected above consists of two loans secured by properties in Greater Baltimore and the Baltimore/Washington Corridor. We did not have an allowance for credit losses in connection with these receivables at March 31, 2012 or December 31, 2011. The fair value of our mortgage and other investing receivables totaled \$32.7 million at March 31, 2012 and \$28.0 million at December 31, 2011.

15

Operating Notes Receivable

We had operating notes receivable due from tenants with terms exceeding one year totaling \$482,000 at March 31, 2012 and \$530,000 at December 31, 2011. We carried allowances for estimated losses for most of these balances.

7. Debt

Our debt consisted of the following (dollars in thousands):

	Maximum Availability at March 31, 2012	Carrying Value at		Stated Interest Rates at March 31, 2012	Scheduled Maturity Dates at March 31, 2012

Total debt		\$ 2,418,078	\$ 2,426,303		

- (1) Several of the fixed rate mortgages carry interest rates that were above or below market rates upon assumption and therefore were recorded at their fair value based on applicable effective interest rates. The carrying values of these loans reflect net unamortized premiums totaling \$2.2 million at March 31, 2012 and \$2.4 million at December 31, 2011.
- (2) The weighted average interest rate on these loans was 6.01% at March 31, 2012.
- (3) The interest rate on the loan outstanding was 2.49% at March 31, 2012.
- (4) The weighted average interest rate on these loans was 2.73% at March 31, 2012.
- (5) The weighted average interest rate on the Revolving Credit Facility was 2.24% at March 31, 2012.
- (6) As described further below, we entered into a new facility effective on February 14, 2012.
- (7) The weighted average interest rate on these loans was 2.15% at March 31, 2012.
- (8) These notes may carry interest rates that were below market rates upon assumption and therefore were recorded at their fair value based on applicable effective interest rates. The carrying value of these notes reflects an unamortized discount totaling \$1.7 million at March 31, 2012 and \$1.8 million at December 31, 2011.
- (9) As described further in our 2011 Annual Report on Form 10-K, these notes have an exchange settlement feature that provides that the notes may, under certain circumstances, be exchangeable for cash and, at the Operating Partnership's discretion, our common shares at an exchange rate (subject to adjustment) of 20.8513 shares per one thousand dollar principal amount of the notes (exchange rate is as of March 31, 2012 and is equivalent to an exchange price of \$47.96 per common share). The carrying value of these notes included a principal amount of \$240.0 million and an unamortized discount totaling \$11.8 million at March 31, 2012 and \$12.7 million at December 31, 2011. The effective interest rate under the notes, including amortization of the issuance costs, was 6.05%. Because the closing price of our common shares at March 31, 2012 and December 31, 2011 was less than the exchange price per common share applicable to these notes, the if-converted value of the notes did not exceed the principal amount. The table below sets forth interest expense recognized on these notes before deductions for amounts capitalized (in thousands):

	For the Three Months Ended March 31,	
	2012	2011
Interest expense at stated interest rate	\$ 2,550	\$ 2,550
Interest expense associated with amortization of discount	892	840
Total	\$ 3,442	\$ 3,390

Effective February 14, 2012, we entered into an unsecured term loan agreement (the "Term Loan Agreement") with a group of lenders for which J.P. Morgan Securities LLC and KeyBank Capital Markets acted as joint lead arrangers and joint book runners, KeyBank National Association acted as administrative agent and JPMorgan Chase Bank, N.A. acted as syndication agent. We borrowed \$250.0 million under the Term Loan Agreement. The term loan matures on February 14, 2017. The variable interest rate on the loan is based on the LIBOR rate (customarily the 30-day rate) plus 1.65% to 2.40%, as determined by our leverage levels.

At March 31, 2012 and December 31, 2011, we were in default on a \$15 million nonrecourse mortgage loan secured by a property with an estimated fair value of approximately \$11 million that is included in our Strategic Reallocation Plan.

We capitalized interest costs of \$3.8 million in the three months ended March 31, 2012 and \$4.3 million in the three months ended March 31, 2011.

The following table sets forth information pertaining to the fair value of our debt (in thousands):

(1) The notional amount of this instrument is scheduled to amortize to \$36.2 million.

(2) As described further in our 2011 Annual Report on Form 10-K, on January 5, 2012, we cash settled these instruments, along with interest accrued thereon, for an aggregate of \$29.7 million. Our policy is to present payments to terminate interest rate swaps entered into in order to hedge forecasted interest payments as operating activities on our consolidated statement of cash flows. Accordingly, the payments to cash settle these instruments were included in net cash provided by operating activities on our consolidated statement of cash flows.

Each of the one-month LIBOR interest rate swaps set forth in the table above was designated as cash flow hedges of interest rate risk.

The table below sets forth the fair value of our interest rate derivatives as well as their classification on our consolidated balance sheet (in thousands):

Amount of loss recognized in AOCL (effective portion)	\$ (1,987)	\$ (136)
Amount of loss reclassified from AOCL into interest expense (effective portion)	(1,474)	(1,104)

Over the next 12 months, we estimate that approximately \$2.5 million will be reclassified from AOCL as an increase to interest expense.

We have agreements with each of our interest rate derivative counterparties that contain provisions under which, if we default or are capable of being declared in default on any of our indebtedness, we could also be declared in default on our derivative obligations. These agreements also incorporate the loan covenant provisions of our indebtedness with a lender affiliate of the derivative counterparties. Failure to comply with the loan covenant provisions could result in our being declared in default on any derivative instrument obligations covered by the agreements. As of March 31, 2012, the fair value of interest rate derivatives in a liability position related to these agreements was \$2.7 million, excluding the effects of accrued interest. As of March 31, 2012, we had not posted any collateral related to these agreements. We are not in default with any of these provisions. If we breached any of these provisions, we could be required to settle our obligations under the agreements at their termination value of \$3.3 million.

9. Shareholders' Equity

During the three months ended March 31, 2012, holders of 34,550 common units in our Operating Partnership converted their units into common shares on the basis of one common share for each common unit.

We declared dividends per common share of \$0.275 in the three months ended March 31, 2012 and \$0.4125 in the three months ended March 31, 2011.

See Note 11 for disclosure of common share activity pertaining to our share-based compensation plans.

10. Information by Business Segment

We have ten reportable operating office property segments (comprised of: the Baltimore/Washington Corridor; Northern Virginia; San Antonio; Washington, DC — Capitol Riverfront; St. Mary's and King George Counties; Greater Baltimore; Suburban Maryland; Colorado Springs; Greater Philadelphia; and other). We also have an operating wholesale data center segment. On January 1, 2012, we revised our reportable segments to include only operating properties. Accordingly, we revised net operating income from real estate operations ("NOI from real estate operations") to exclude operating expenses not related to operating properties, revised our definition of segment assets to include only long-lived assets associated with operating properties and revised our definition of additions to long-lived assets to include only additions to existing operating properties (excluding acquisitions and transfers from non-operating properties). Financial information for prior periods has been presented in conformity with this revision.

The table below reports segment financial information for our reportable segments (in thousands). We measure the performance of our segments through the measure we define as NOI from real estate operations, which is derived by subtracting property operating expenses from revenues from real estate operations.

As previously discussed, we provide real estate services such as property management and construction and development services primarily for our properties but also for third parties. The primary manner in which we evaluate the operating performance of our service activities is through a measure we define as net operating income from service operations ("NOI from service operations"), which is based on the net of revenues and expenses from these activities. Construction contract and other service revenues and expenses consist primarily of subcontracted costs that are reimbursed to us by the customer along with a management fee. The operating margins from these activities are small relative to the revenue. We believe NOI from service operations is a useful measure in assessing both our level of activity and our profitability in conducting such operations. The table below sets forth the computation of our NOI from service operations (in thousands):

	For the Three Months Ended March 31,	
	2012	2011
Construction contract and other service revenues	\$ 21,534	\$ 21,028
Construction contract and other service expenses	(20,607)	(20,618)

Other assets	151,365	155,243
Total assets	\$ 3,797,368	\$ 3,865,809

The accounting policies of the segments are the same as those used to prepare our consolidated financial statements, except that discontinued operations are not presented separately for segment purposes. In the segment reporting presented above, we did not allocate interest expense, depreciation and amortization and impairment losses to our real estate segments since they are not included in the measure of segment profit reviewed by management. We also did not allocate general and administrative expenses, business development expenses and land carry costs, interest and other income, equity in (loss) income of unconsolidated entities, income taxes and noncontrolling interests because these items represent general corporate or non-operating property items not attributable to segments.

[Table of Contents](#)**11. Share-Based Compensation****Performance Share Units (“PSUs”)**

On March 1, 2012, our Board of Trustees granted 54,070 PSUs with an aggregate grant date fair value of \$1.8 million to executives. The PSUs have a performance period beginning on January 1, 2012 and concluding on the earlier of December 31, 2014 or the date of: (1) termination by the Company without cause, death or disability of the executive or constructive discharge of the executive (collectively, “qualified termination”); or (2) a sale event. The number of PSUs earned (“earned PSUs”) at the end of the performance period will be determined based on the percentile rank of the Company’s total shareholder return relative to a peer group of companies, as set forth in the following schedule:

Percentile Rank	Earned PSUs Payout %
75th or greater	200% of PSUs granted
50th	100% of PSUs granted
25th	50% of PSUs granted
Below 25th	0% of PSUs granted

If the percentile rank exceeds the 25th percentile and is between two of the percentile ranks set forth in the table above, then the percentage of the earned PSUs will be interpolated between the ranges set forth in the table above to reflect any performance between the listed percentiles. At the end of the performance period, we, in settlement of the award, will issue a number of fully-vested common shares equal to the sum of:

- the number of earned PSUs in settlement of the award plan; plus
- the aggregate dividends that would have been paid with respect to the common shares issued in settlement of the earned PSUs through the date of settlement had such shares been issued on the grant date, divided by the share price on such settlement date, as defined under the terms of the agreement.

If a performance period ends due to a sale event or qualified termination, the number of earned PSUs is prorated based on the portion of the three-year performance period that has elapsed. If employment is terminated by the employee or by the Company for cause, all PSUs are forfeited. PSUs do not carry voting rights.

We computed a grant date fair value of \$32.77 per PSU using a Monte Carlo model, which included assumptions of, among other things, the following: baseline common share value of \$24.39; expected volatility for our common shares of 43.2%; and risk-free interest rate of 0.41%. We are recognizing the grant date fair value in connection with these PSU awards over the performance period.

All PSUs granted on March 4, 2010 and outstanding at December 31, 2011 were held by Mr. Randall M. Griffin, our Chief Executive Officer, and were terminated upon his retirement on March 31, 2012. Based on the Company’s total shareholder return relative its peer group of companies, there was no payout value in connection with the termination of the PSUs.

The PSUs granted to our executives on March 3, 2011, as described in our 2011 Annual Report on Form 10-K, were outstanding at March 31, 2012.

Restricted Shares

During the three months ended March 31, 2012, certain employees were granted a total of 87,449 restricted shares with an aggregate grant date fair value of \$2.1 million (weighted average of \$24.39 per share). Restricted shares granted to employees vest based on increments and over periods of time set forth

22

[Table of Contents](#)

under the terms of the respective awards provided that the employees remain employed by us. During the three months ended March 31, 2012, forfeiture restrictions lapsed on 251,985 previously issued common shares; these shares had a weighted average grant date fair value of \$31.93 per share, and the aggregate intrinsic value of the shares on the vesting dates was \$6.2 million.

Options

During the three months ended March 31, 2012, 5,667 options to purchase common shares (“options”) were exercised. The weighted average exercise price of these options was \$14.54 per share, and the aggregate intrinsic value of the options exercised was \$56,000.

12. Income Taxes

We own a taxable REIT subsidiary (“TRS”) that is subject to Federal and state income taxes. Our TRS’s provision for income tax (expense) benefit consisted of the following (in thousands):

	For the Three Months Ended March 31,	
	2012	2011
Deferred		
Federal	\$ (3,417)	\$ 447
State	(756)	100

Current		
Federal	—	(2)
State	—	(1)
	—	(3)
Total income tax (expense) benefit	\$ (4,173)	\$ 544

Items in our TRS contributing to temporary differences that lead to deferred taxes include depreciation and amortization, share-based compensation, certain accrued compensation, compensation paid in the form of contributions to a deferred nonqualified compensation plan, impairment losses and net operating losses that are not deductible until future periods.

Our TRS’s combined Federal and state effective tax rate was 38.6% for the three months ended March 31, 2012 and 2011.

13. Discontinued Operations and Assets Held for Sale

Income from discontinued operations primarily includes revenues and expenses associated with the following:

- 1344 and 1348 Ashton Road and 1350 Dorsey Road in the Baltimore/Washington Corridor that were sold on May 24, 2011;
- 216 Schilling Circle in Greater Baltimore that was sold on August 23, 2011;
- four properties comprising the Towson Portfolio in Greater Baltimore that were sold on September 29, 2011;
- 11011 McCormick Road in Greater Baltimore that was sold on November 1, 2011;
- 10001 Franklin Square Drive in Greater Baltimore that was sold on December 13, 2011;
- 13 properties comprising the Rutherford Business Center portfolio in Greater Baltimore that were sold on December 15, 2011;
- three properties comprising the White Marsh Professional Center, 8615 Ridgely’s Choice and 8114 Sandpiper Circle in Greater Baltimore that were sold on January 30, 2012;

23

- 1101 Sentry Gateway in San Antonio that was sold on January 31, 2012;
- 222 and 224 Schilling Circle in the Greater Baltimore region that were sold on February 10, 2012; and
- four operating properties that were classified as held for sale as of March 31, 2012, including the following:
 - 226 Schilling Circle in Greater Baltimore;
 - 11800 Tech Road in Suburban Maryland; and
 - 15 and 45 West Gude Drive in Suburban Maryland.

14. Earnings Per Share ("EPS")

We present both basic and diluted EPS. We compute basic EPS by dividing net income available to common shareholders allocable to unrestricted common shares under the two-class method by the weighted average number of unrestricted common shares outstanding during the period. Our computation of diluted EPS is similar except that:

- the denominator is increased to include: (1) the weighted average number of potential additional common shares that would have been outstanding if securities that are convertible into our common shares were converted; and (2) the effect of dilutive potential common shares outstanding during the period attributable to share-based compensation using the treasury stock or if-converted methods; and
- the numerator is adjusted to add back any changes in income or loss that would result from the assumed conversion into common shares that we added to the denominator.

24

Summaries of the numerator and denominator for purposes of basic and diluted EPS calculations are set forth below (in thousands, except per share data):

Our diluted EPS computations do not include the effects of the following securities since the conversions of such securities would increase diluted EPS for the respective periods (in thousands):

	Weighted Average Shares Excluded from Denominator For the Three Months Ended March 31,	
	2012	2011
Conversion of common units	—	4,396
Conversion of convertible preferred units	176	176

The following share-based compensation securities were excluded from the computation of diluted EPS because their effect was antidilutive:

- weighted average restricted shares for the three months ended March 31, 2012 and 2011 of 572,000 and 651,000, respectively; and

25

[Table of Contents](#)

· weighted average options for the three months ended March 31, 2012 and 2011 of 819,000 and 1.2 million, respectively.

As discussed in Note 7, we have outstanding senior notes that have an exchange settlement feature but did not affect our diluted EPS reported above since the weighted average closing price of our common shares during each of the periods was less than the exchange prices per common share applicable for such periods.

15. Commitments and Contingencies

Litigation

In the normal course of business, we are involved in legal actions arising from our ownership and administration of properties. We establish reserves for specific legal proceedings when we determine that the likelihood of an unfavorable outcome is probable and the amount of loss can be reasonably estimated. Management does not anticipate that any liabilities that may result from such proceedings will have a materially adverse effect on our financial position, operations or liquidity. Our assessment of the potential outcomes of these matters involves significant judgment and is subject to change based on future developments.

Environmental

We are subject to various Federal, state and local environmental regulations related to our property ownership and operation. We have performed environmental assessments of our properties, the results of which have not revealed any environmental liability that we believe would have a materially adverse effect on our financial position, operations or liquidity.

Joint Ventures

In connection with our 2005 contribution of properties to an unconsolidated partnership in which we hold a partnership interest, we entered into standard nonrecourse loan guarantees (environmental indemnifications and guarantees against fraud and misrepresentation, and springing guarantees of partnership debt in the event of a voluntary bankruptcy of the partnership). The maximum amount we could be required to pay under the guarantees is approximately \$65 million. We are entitled to recover 20% of any amounts paid under the guarantees from an affiliate of our partner pursuant to an indemnity agreement so long as we continue to manage the properties. In the event that we no longer manage the properties, the percentage that we are entitled to recover is increased to 80%. Management estimates that the aggregate fair value of the guarantees is not material and would not exceed the amounts included in distributions received in excess of investment in unconsolidated real estate joint venture reported on the consolidated balance sheets.

We are party to a contribution agreement that formed a joint venture relationship with a limited partnership to develop up to 1.8 million square feet of office space on 63 acres of land located in Hanover, Maryland. As we and the joint venture partner agree to proceed with the construction of buildings in the future, our joint venture partner would contribute land into newly-formed entities and we would make cash capital contributions into such entities to fund development and construction activities for which financing is not obtained. We owned a 50% interest in one such joint venture as of March 31, 2012.

We may be required to make our pro rata share of additional investments in our real estate joint ventures (generally based on our percentage ownership) in the event that additional funds are needed. In the event that the other members of these joint ventures do not pay their share of investments when additional funds are needed, we may then deem it appropriate to make even larger investments in these joint ventures.

[Table of Contents](#)

Tax Incremental Financing Obligation

In August 2010, Anne Arundel County, Maryland issued \$30 million in tax incremental financing bonds to third-party investors in order to finance public improvements needed in connection with our project known as National Business Park North. The real estate taxes on increases in assessed value of a development district encompassing National Business Park North are to be transferred to a special fund pledged to the repayment of the bonds. We recognized a \$4.4 million liability through March 31, 2012 representing the estimated fair value of our obligation to fund through a special tax any future shortfalls between debt service on the bonds and real estate taxes available to repay the bonds.

Environmental Indemnity Agreement

We agreed to provide certain environmental indemnifications in connection with a lease and subsequent sale of three New Jersey properties. The prior owner of the properties, a Fortune 100 company that is responsible for groundwater contamination at such properties, previously agreed to indemnify us for (1) direct losses incurred in connection with the contamination and (2) its failure to perform remediation activities required by the State of New Jersey, up to the point that the state declares the remediation to be complete. Under the environmental indemnification agreement, we agreed to the following:

- to indemnify the tenant against losses covered under the prior owner's indemnity agreement if the prior owner fails to indemnify the tenant for such losses. This indemnification is capped at \$5.0 million in perpetuity after the State of New Jersey declares the remediation to be complete;
- to indemnify the tenant for consequential damages (e.g., business interruption) at one of the buildings in perpetuity and another of the buildings for 15 years after the tenant's acquisition of the property from us. This indemnification is limited to \$12.5 million; and
- to pay 50% of additional costs related to construction and environmental regulatory activities incurred by the tenant as a result of the indemnified environmental condition of the properties. This indemnification is limited to \$300,000 annually and \$1.5 million in the aggregate.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Overview

We are an office real estate investment trust (“REIT”) that focuses primarily on serving the specialized requirements of strategic customers in the United States Government and defense information technology sectors. We acquire, develop, manage and lease office and data center properties that are typically concentrated in large office parks primarily located adjacent to government demand drivers and/or in office parks that we believe possess growth opportunities.

During the three months ended March 31, 2012, we:

- had an increase in net income attributable to common shareholders of \$24.5 million as compared to the three months ended March 31, 2011, due in large part to a decrease in impairment losses attributable primarily to a \$27.7 million loss recognized on our property in Cascade, Maryland that was formerly the Army base known as Fort Ritchie (“Fort Ritchie”) in the three months ended March 31, 2011;
- had an increase of \$3.1 million as compared to the three months ended March 31, 2011 in our net operating income (“NOI”) from real estate operations (defined below) attributable to our Same Office Properties (also defined below);
- finished the period with occupancy of our portfolio of operating office properties at 87.0%;
- sold eight operating properties totaling 314,000 square feet and non-operating properties for aggregate sale prices totaling \$62.7 million. The net proceeds from these sales were used primarily to pay down our Revolving Credit Facility; and
- entered into an unsecured term loan agreement, under which we borrowed \$250.0 million. The term loan agreement matures on February 14, 2017. The net proceeds from these borrowings were used to pay down our Revolving Credit Facility.

We discuss significant factors contributing to changes in our net income attributable to common shareholders and diluted earnings per share over the prior year period in the section below entitled “Results of Operations.” In addition, the section below entitled “Liquidity and Capital Resources” includes discussions of, among other things:

- how we expect to generate cash for short and long-term capital needs; and
- our commitments and contingencies.

You should refer to our consolidated financial statements as you read this section.

This section contains “forward-looking” statements, as defined in the Private Securities Litigation Reform Act of 1995, that are based on our current expectations, estimates and projections about future events and financial trends affecting the financial condition and operations of our business. Forward-looking statements can be identified by the use of words such as “may,” “will,” “should,” “could,” “believe,” “anticipate,” “expect,” “estimate,” “plan” or other comparable terminology. Forward-looking statements are inherently subject to risks and uncertainties, many of which we cannot predict with accuracy and some of which we might not even anticipate. Although we believe that the expectations, estimates and projections reflected in such forward-looking statements are based on reasonable assumptions at the time made, we can give no assurance that these expectations, estimates and projections will be achieved. Future events and actual results may differ materially from those discussed in the forward-looking statements. Important factors that may affect these expectations, estimates and projections include, but are not limited to:

- general economic and business conditions, which will, among other things, affect office property and data center demand and rents, tenant creditworthiness, interest rates, financing availability and property values;
- adverse changes in the real estate markets, including, among other things, increased competition with other companies;

[Table of Contents](#)

- governmental actions and initiatives, including risks associated with the impact of a government shutdown or budgetary reductions or impasses, such as a reduction in rental revenues, non-renewal of leases and/or a curtailment of demand for additional space by our strategic customers;
- our ability to sell properties included in our Strategic Reallocation Plan;
- our ability to borrow on favorable terms;
- risks of real estate acquisition and development activities, including, among other things, risks that development projects may not be completed on schedule, that tenants may not take occupancy or pay rent or that development and operating costs may be greater than anticipated;
- risks of investing through joint venture structures, including risks that our joint venture partners may not fulfill their financial obligations as investors or may take actions that are inconsistent with our objectives;
- changes in our plans for properties or views of market economic conditions or failure to obtain development rights, either of which could result in recognition of impairment losses;
- our ability to satisfy and operate effectively under Federal income tax rules relating to real estate investment trusts and partnerships;
- the dilutive effects of issuing additional common shares; and
- environmental requirements.

We undertake no obligation to update or supplement forward-looking statements.

Occupancy and Leasing

Wholesale Data Center Property

Our shell-complete wholesale data center property, which upon completion and stabilization is expected to have a critical load of 18 megawatts, had three megawatts in operations at March 31, 2012 and December 31, 2011 that was leased to tenants with further expansion rights of up to a combined five megawatts. We did not complete any leases on this property during the three months ended March 31, 2012.

Results of Operations

We evaluate the operating performance of our properties using NOI from real estate operations, our segment performance measure which is derived by subtracting property operating expenses from revenues from real estate operations. We view our NOI from real estate operations as comprising the following primary categories of operating properties:

- office properties owned and 100% operational throughout the current and prior year reporting periods, excluding properties included in the Strategic Reallocation Plan. We define these as changes from “Same Office Properties”;
- office properties acquired during the current and prior year reporting periods;
- constructed office properties placed into service that were not 100% operational throughout the current and prior year reporting periods; and
- properties included in the Strategic Reallocation Plan that were not sold as of March 31, 2012; and
- property dispositions.

Refer to Note 13 of the consolidated financial statements for a summary of operating properties that were either disposed or classified as held for sale and therefore are included in discontinued operations.

The primary manner in which we evaluate the operating performance of our construction management and other service activities is through a measure we define as NOI from service operations, which is based on the net of the revenues and expenses from these activities. The revenues and expenses from these activities consist primarily of subcontracted costs that are reimbursed to us by customers along with a management fee. The operating margins from these activities are small relative to the revenue. We believe NOI from service operations is a useful measure in assessing both our level of activity and our profitability in conducting such operations.

We believe that operating income, as reported on our consolidated statements of operations, is the most directly comparable generally accepted accounting principles (“GAAP”) measure for both NOI from real estate operations and NOI from service operations. Since both of these measures exclude certain items includable in operating income, reliance on these measures has limitations; management compensates for these limitations by using the measures simply as supplemental measures that are considered alongside other GAAP and non-GAAP measures.

The decrease in property operating expenses of Same Office Properties was primarily due to decreases in snow removal and utility expenses resulting from a milder winter in the Mid Atlantic region in the current period.

Impairment Losses

We recognized the impairment losses described below in the current and prior periods:

- as described further in Note 4 to the consolidated financial statements, we recognized aggregate net impairment losses in the three months ended March 31, 2012 of \$6.6 million (including \$1.5 million classified as discontinued operations and \$1.1 million in exit costs) on dispositions completed or expected to occur in connection with the Strategic Reallocation Plan; and
- as described further in our 2011 Annual Report on Form 10-K, we recognized an impairment loss of \$27.7 million on Fort Ritchie in the three months ended March 31, 2011.

The table below sets forth impairment losses (recoveries) recognized by property classification:

Income Tax (Expense) Benefit

The income tax expense recognized in the current period was due primarily to the impact of an out-of-period adjustment. See Note 2 of the consolidated financial statements for additional information.

Discontinued Operations

The increase in discontinued operations was due primarily to \$4.1 million in gains on sales of real estate recognized in the current period.

Gain on Sales of Real Estate, Net of Income Taxes

The decrease in gain on sales of real estate was attributable to our sale of a land parcel in Hunt Valley, Maryland in the prior period.

Funds from Operations

Funds from operations (“FFO”) is defined as net income computed using GAAP, excluding gains on sales of, and impairment losses on, previously depreciated operating properties, plus real estate-related depreciation and amortization. We believe that we use the National Association of Real Estate Investment Trusts (“NAREIT”) definition of FFO, although others may interpret the definition differently and, accordingly, our presentation of FFO may differ from those of other REITs. We believe that FFO is useful to management and investors as a supplemental measure of operating performance because, by excluding gains related to sales of, and impairment losses on, previously depreciated operating properties, net of related tax benefit, and excluding real estate-related depreciation and amortization, FFO can help one compare our operating performance between periods. In addition, since most equity REITs provide FFO information to the investment community, we believe that FFO is useful to investors as a supplemental measure for comparing our results to those of other equity REITs. We believe that net income is the most directly comparable GAAP measure to FFO.

Since FFO excludes certain items includable in net income, reliance on the measure has limitations; management compensates for these limitations by using the measure simply as a supplemental measure that is weighed in the balance with other GAAP and non-GAAP measures. FFO is not necessarily an indication of our cash flow available to fund cash needs. Additionally, it should not be used as an alternative to net income when evaluating our financial performance or to cash flow from operating, investing and financing activities when evaluating our liquidity or ability to make cash distributions or pay debt service.

Basic FFO available to common share and common unit holders (“Basic FFO”) is FFO adjusted to subtract (1) preferred share dividends, (2) income attributable to noncontrolling interests through ownership of preferred units in the Operating Partnership or interests in other consolidated entities not owned by us, (3) depreciation and amortization allocable to noncontrolling interests in other consolidated entities and (4) Basic FFO allocable to restricted shares. With these adjustments, Basic FFO represents FFO available to common shareholders and common unitholders. Common units in the Operating Partnership are substantially similar to our common shares and are exchangeable into common shares, subject to certain conditions. We believe that Basic FFO is useful to investors due to the close correlation of common units to common shares. We believe that net income is the most directly comparable GAAP measure to Basic

[Table of Contents](#)

FFO. Basic FFO has essentially the same limitations as FFO; management compensates for these limitations in essentially the same manner as described above for FFO.

Diluted FFO available to common share and common unit holders (“Diluted FFO”) is Basic FFO adjusted to add back any changes in Basic FFO that would result from the assumed conversion of securities that are convertible or exchangeable into common shares. We believe that Diluted FFO is useful to investors because it is the numerator used to compute Diluted FFO per share, discussed below. We believe that the numerator for diluted EPS is the most directly comparable GAAP measure to Diluted FFO. Since Diluted FFO excludes certain items includable in the numerator to diluted EPS, reliance on the measure has limitations; management compensates for these limitations by using the measure simply as a supplemental measure that is weighed in the balance with other GAAP and non-GAAP measures. Diluted FFO is not necessarily an indication of our cash flow available to fund cash needs. Additionally, it should not be used as an alternative to net income when evaluating our financial performance or to cash flow from operating, investing and financing activities when evaluating our liquidity or ability to make cash distributions or pay debt service.

Diluted FFO, as adjusted for comparability is defined as Diluted FFO adjusted to exclude operating property acquisition costs, gains on sales of, and impairment losses on, properties other than previously depreciated operating properties, net of associated income tax, gain or loss on early extinguishment of debt and loss on interest rate swaps. We believe that the excluded items are not reflective of normal operations and, as a result, we believe that a measure that excludes these items is a useful supplemental measure in evaluating our operating performance. We believe that the numerator to diluted EPS is the most directly comparable GAAP measure to this non-GAAP measure. This measure has essentially the same limitations as Diluted FFO, as well as the further limitation of not reflecting the effects of the excluded items; we compensate for these limitations in essentially the same manner as described above for Diluted FFO.

Diluted FFO per share is (1) Diluted FFO divided by (2) the sum of the (a) weighted average common shares outstanding during a period, (b) weighted average common units outstanding during a period and (c) weighted average number of potential additional common shares that would have been outstanding during a period if other securities that are convertible or exchangeable into common shares were converted or exchanged. We believe that Diluted FFO per share is useful to investors because it provides investors with a further context for evaluating our FFO results in the same manner that investors use earnings per share (“EPS”) in evaluating net income available to common shareholders. In addition, since most equity REITs provide Diluted FFO per share information to the investment community, we believe that Diluted FFO per share is a useful supplemental measure for comparing us to other equity REITs. We believe that diluted EPS is the most directly comparable GAAP measure to Diluted FFO per share. Diluted FFO per share has most of the same limitations as Diluted FFO (described above); management compensates for these limitations in essentially the same manner as described above for Diluted FFO.

Diluted FFO per share, as adjusted for comparability is (1) Diluted FFO, as adjusted for comparability divided by (2) the sum of the (a) weighted average common shares outstanding during a period, (b) weighted average common units outstanding during a period and (c) weighted average number of potential additional common shares that would have been outstanding during a period if other securities that are convertible or exchangeable into common shares were converted or exchanged. We believe that this

measure is useful to investors because it provides investors with a further context for evaluating our FFO results. We believe that diluted EPS is the most directly comparable GAAP measure to this per share measure. This measure has most of the same limitations as Diluted FFO (described above) as well as the further limitation of not reflecting the effects of the excluded items; we compensate for these limitations in essentially the same manner as described above for Diluted FFO.

The computations for all of the above measures on a diluted basis assume the conversion of common units in our Operating Partnership but do not assume the conversion of other securities that are convertible into common shares if the conversion of those securities would increase per share measures in a given period.

[Property Additions](#)

The table below sets forth the major components of our additions to properties for the three months ended March 31, 2012 (in thousands):

Construction, development and redevelopment	\$ 33,546
Tenant improvements on operating properties	948(1)

Capital improvements on operating properties	1,694
	<u>\$ 36,188</u>

(1) Tenant improvement costs incurred on newly-constructed properties are classified in this table as construction, development and redevelopment.

Cash Flows

Our net cash flow provided by operating activities increased \$10.8 million when comparing the three months ended March 31, 2012 and 2011 due primarily to: an increase in cash flow received from real estate operations, which was affected by the timing of cash receipts; an increase in cash flow associated with the timing of cash flow from third-party construction projects; and \$7.0 million in proceeds from the sale of our KEYW common stock in the current period; offset in part by \$29.7 million paid to cash settle interest rate swaps in the current period.

Our net cash flow provided by investing activities increased \$69.2 million when comparing the three months ended March 31, 2012 and 2011 due primarily to a \$58.1 million increase from sales of properties. Property sales in the current period included the disposition of properties in connection with the Strategic Reallocation Plan. Property sales in the prior period included the disposition of a land parcel in Hunt Valley, Maryland.

Our net cash flow used in financing activities increased \$80.1 million when comparing the three months ended March 31, 2012 and 2011 due primarily to:

- a \$311.4 million increase in debt repayments. Our debt repayments in the current period included primarily \$337.0 million to pay down our Revolving Credit Facility using mostly proceeds from a new \$250.0 million term loan agreement and property sales. Our debt repayments in the prior period included primarily \$25.0 million to pay down our Revolving Credit Facility using mostly proceeds from draws under construction loan facilities; offset in part by
- a \$233.8 million increase in proceeds from debt. Our proceeds in the current period included primarily: (1) \$250.0 million upon origination of the new term loan agreement; and (2) \$71.0 million in draws under our Revolving Credit Facility. Our proceeds in the prior period included primarily \$78.0 million in draws under our Revolving Credit Facility.

Liquidity and Capital Resources

Our primary cash requirements are for operating expenses, debt service, development of new properties, improvements to existing properties and acquisitions. We expect to continue to use cash flow provided by operations as the primary source to meeting our short-term capital needs, including property operating expenses, general and administrative expenses, interest expense, scheduled principal amortization of debt, dividends to our shareholders, distributions to our noncontrolling interest holders of preferred and common units in the Operating Partnership and improvements to existing properties. We believe that our liquidity and capital resources are adequate for our near-term and longer-term requirements without necessitating property sales. However, we do expect to generate significant cash by selling properties during the remainder of 2012 and in 2013.

We have historically relied on fixed-rate, non-recourse mortgage loans from banks and institutional lenders for long-term financing and to restore availability on our Revolving Credit Facility. In recent years, we have relied more on unsecured bank loans and publicly issued, convertible unsecured debt for long-term

Table of Contents

financing. We also periodically access the public equity markets to raise capital by issuing common and/or preferred shares.

We often use our Revolving Credit Facility to initially finance much of our investing activities. We then pay down the facility using proceeds from long-term borrowings, equity issuances and property sales. The lenders' aggregate commitment under the facility is \$1.0 billion, with a right for us to increase the lenders' aggregate commitment to \$1.5 billion, provided that there is no default under the facility. Amounts available under the facility are computed based on 60% of our unencumbered asset value, as defined in the agreement. The Revolving Credit Facility matures on September 1, 2014, and may be extended by one year at our option, provided that there is no default under the facility and we pay an extension fee of 0.20% of the total availability of the facility. As of March 31, 2012, the maximum borrowing capacity under this facility totaled \$1.0 billion, of which \$590.6 million was available.

We also have construction loan facilities that provide for aggregate borrowings of up to \$123.8 million, \$73.2 million of which was available at March 31, 2012 to fund future construction costs at specific projects.

The following table summarizes our contractual obligations as of March 31, 2012 (in thousands):

(1) The contractual obligations set forth in this table generally exclude property operations contracts that had a value of less than \$20,000. Also excluded are contracts associated with the operations of our properties that may be terminated with notice of one month or less, which is the arrangement that applies to most of our property operations contracts.

(2) Represents scheduled principal amortization payments and maturities only and therefore excludes a net discount of \$11.4 million.

- (3) Represents interest costs for debt at March 31, 2012 for the terms of such debt. For variable rate debt, the amounts reflected above used March 31, 2012 interest rates on variable rate debt in computing interest costs for the terms of such debt.
- (4) Represents contractual obligations pertaining to new construction and redevelopment activities. Construction and redevelopment activities underway at March 31, 2012 included the following:

Activity	Number of Properties	Square Feet (in thousands)	Estimated Remaining Costs (in millions)	Expected Year For Costs to be Incurred Through
Construction of new office properties	6	789	\$ 61.2	2013
Redevelopment of existing office properties	1	113	6.4	2013

- (5) Due to the long-term nature of certain construction and development contracts and leases included in these lines, the amounts reported in the table represent our estimate of the timing for the related obligations being payable.
- (6) Represents contractual obligations pertaining to projects for which we are acting as construction manager on behalf of unrelated parties who are our clients. We expect to be reimbursed in full for these costs by our clients.
- (7) Represents contractual obligations pertaining to recurring and nonrecurring capital expenditures for our operating properties. We expect to finance these costs primarily using cash flow from operations.
- (8) We expect to pay these items using cash flow from operations.

- (9) Primarily represents contractual obligations pertaining to managed-energy service contracts in place for certain of our operating properties. We expect to pay these items using cash flow from operations.

We expect to spend more than \$150 million on construction and development costs and approximately \$70 million on improvements to operating properties (including the commitments set forth in the table above) during the remainder of 2012. We expect to fund these costs and our debt maturities during the remainder of 2012 using primarily a combination of borrowings under our Revolving Credit Facility and existing construction loan facilities. We expect to sell more than \$130 million of properties during the remainder of 2012 and use the proceeds primarily to pay down our Revolving Credit Facility and pay off debt secured by the properties.

Certain of our debt instruments require that we comply with a number of restrictive financial covenants, including maximum leverage ratio, unencumbered leverage ratio, minimum net worth, minimum fixed charge coverage, minimum unencumbered interest coverage ratio, minimum debt service and maximum secured indebtedness ratio. As of March 31, 2012, we were well within the compliance requirements of these financial covenants.

[Off-Balance Sheet Arrangements](#)

We had no significant changes in our off-balance sheet arrangements from those described in the section entitled "Off-Balance Sheet Arrangements" in our 2011 Annual Report on Form 10-K.

[Inflation](#)

Most of our tenants are obligated to pay their share of a building's operating expenses to the extent such expenses exceed amounts established in their leases, based on historical expense levels. Some of our tenants are obligated to pay their full share of a building's operating expenses. These arrangements somewhat reduce our exposure to increases in such costs resulting from inflation.

[Item 3. Quantitative and Qualitative Disclosures about Market Risk](#)

We are exposed to certain market risks, the most predominant of which is change in interest rates. Increases in interest rates can result in increased interest expense under our Revolving Credit Facility and other variable rate debt. Increases in interest rates can also result in increased interest expense when our fixed rate debt matures and needs to be refinanced.

The following table sets forth as of March 31, 2012 our debt obligations and weighted average interest rates for fixed rate debt by expected maturity date (dollars in thousands):

	For the Periods Ending December 31,							Total
	2012	2013	2014	2015	2016	Thereafter		
Long term debt: (1)								
Fixed rate debt (2)	\$ 45,426	\$ 144,345	\$ 157,965	\$ 363,595	\$ 278,642	\$ 303,879	\$ 1,293,852	
Weighted average interest rate	6.37%	5.62%	6.41%	4.66%	6.57%	5.52%	5.65%	
Variable rate debt	\$ 17,381	\$ 24,998	\$ 396,815	\$ 446,427	\$ —	\$ 250,000	\$ 1,135,621	

- (1) Maturities include \$16.8 million during the remainder of 2012, \$24.2 million in 2013, \$396.0 million in 2014 and \$409.6 million in 2015 that may each be extended for one year, subject to certain conditions.
- (2) Represents principal maturities only and therefore excludes net discounts of \$11.4 million.

The fair market value of our debt was \$2.4 billion at March 31, 2012. If interest rates had been 1% lower, the fair value of our fixed-rate debt would have increased by approximately \$78 million at March 31, 2012.

The following table sets forth information pertaining to interest rate swap contracts in place as of March 31, 2012 and December 31, 2011 and their respective fair values (dollars in thousands):

(1) The notional amount of this instrument is scheduled to amortize to \$36.2 million.

(2) As described further in our 2011 Annual Report on Form 10-K, on January 5, 2012, we cash settled these instruments, along with interest accrued thereon, for an aggregate of \$29.7 million.

Based on our variable-rate debt balances, including the effect of interest rate swap contracts, our interest expense would have increased by \$1.3 million in the three months ended March 31, 2012 if short-term interest rates were 1% higher.

Item 4. Controls and Procedures

(a) Evaluation of Disclosure Controls and Procedures

Our management, with the participation of our Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Exchange Act) as of March 31, 2012. Based on this evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures as of March 31, 2012 were functioning effectively to provide reasonable assurance that the information required to be disclosed by us in reports filed or submitted under the Securities Exchange Act of 1934 is (i) recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and (ii) accumulated and communicated to our management, including our principal executive and principal financial officers, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure.

(b) Change in Internal Control over Financial Reporting

No change in our internal control over financial reporting occurred during the most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.
